

My friends - I haven't asked for anything in the Fingering Guides for a long time. But the servers need to run 24/7 for you to be able to get to our information. This costs real money, and there isn't much of it.

I'm asking for your generosity this year to help me out. Any amount is nice - just click my picture on the left and you'll be directed to a page where you can use PayPal, a credit card, or the regular mails to donate.
Thank you,
Mark Charette

Alternate Fingering Chart for Saxophone

Upper Altissimo: D₇ to D₈

This fingering chart includes both basic fingerings and alternatives that are more appropriate in some passages. Some alternate fingerings are designed for fast passages, while others modify the tone, color, or pitch at normal and extreme dynamic levels. These fingerings are the same on all sizes of saxophone (soprano, alto, tenor, baritone, and bass) unless specified otherwise.
